## INTRODUCTION

Women strengthening has turned into the focal point of significant dialog and consideration everywhere throughout the world and it is related with research in numerous educational orders including grown-up education. While trying to connect the sex uniqueness in the creating scene various offices are attempting to raise the status of women with the goal that they become progressively obvious in different jobs, for example, financial, political and common initiative. Over too many years of the women development crosswise over India, prepared for an expanding accentuation on the advancement of associations for women improvement and discourses on women status and strengthening.

In India women are more in number than men. Greater part of the women confronting some basic issues in their everyday life like sexual orientation separation in family, society, work place and so forth. Government has actualized a few strengthening software engineers to create or engage the women. Be that as it may, they have not made any surprising improvement in their family and living conditions. It might be expected to the non-accessibility of education and learning on data about the developing technologies. Taught women impact all the relatives with whom they manage and it annihilates the poverty in this manner activating improvement.

Educated women contribute towards statistic improvement by decreasing fruitfulness, by affecting the time of marriage, improvement in tyke social insurance and sustenance, improving pre-school

capacities of youngsters and improvement of the monetary status of the family by taking an interest in pay gaining exercises and in this way expanding family income (Ravikumar, 2006).

The general public has built up and kept up various types of public and private foundations to address the issues of women. Libraries are the main office to the network for gathering, protecting, transmitting and verifying the greatest and best utilization of the records of progress by the general public of which it is a section. Public library has developed as a fundamental spot in the public eye since it give different services to the normal and standard individuals. It involves a significant spot in present day society as an operator of educational data. Public library is viewed as a necessary piece of the general public as it assumes a significant job in the dispersion of thoughts, the inventive utilization of recreation time, protection of national legacy, social, social and educational improvement of the general public (Satpute, 2008). Public library is a neighborhood focus and open to all the public and has a key job in gathering, arranging and misusing data promptly accessible to its clients. Henceforth public library is one of the social establishment which takes care of the educational, social, recreational and instructive needs of the general public.

Individuals require data for their self-improvement; it assumes a significant job in the financial, social and the political advancement. Data is a basic segment of every single human movement. It is one of the major assets vital for improvement in all

the indispensable circles of the life of cultivated society. It encourages women to comprehend the monetary and political element of the issue both National and International. Data help women to settle on choices and address their issues identifying with Health care, Employment, Housing, Transportation and to enable them in their everyday life. In innovative time, data is basic for every single women who takes an interest in basic leadership process. Subsequently this examination plans to assess the various exercises of the public library on women strengthening.

## ROLE OF LIBRARY ON WOMEN EMPOWERMENT

Job of library on Women Empowerment was less lively during before days yet today. It is exceptionally powerful in nature as a result of the advancement of science and innovation in the public arena. The financial and social advancements are changing, to cause the women to instruct and socialized and in that capacity the general public requires a powerful educational framework and a decent library. Without libraries there can be nothing more than a bad memory school, school, and college and there can be long lasting education of grown-ups. A casual education starts and a deep rooted learning procedure is proceeded with just with the assistance of sufficient and legitimate library services. Public Library reacted to the test to give energizing chance to enable the women.

## REVIEW OF LITERATURE

### *Library*

Library is a social organization and it go about as social administration office offering different data to its clients. It is depicted as the brain of society and which mirrors its impact in embellishment the life of the network. Libraries have constantly assumed an indispensable job in advancing education and research, creating perusing propensities and dispersal of learning and data. (Bhuvaneshwari and Vivek, 2013). Libraries especially rustic libraries may give augmentation administration to provincial individuals in their regions offering different sorts of reports and administration to the nearby individuals of the town. (Gautam and Sunil Kumar, 2004)

Library might be sorted as National, Academic, Public and Special libraries. The National Knowledge Commission of India which comprised in June 2005 portrayed library as entryway of information and proceeded with that library isn't a structure stacked with books – it is an archive and wellspring of data and thought, a spot for learning and asking and for the age of idea and making of new information. Public library specifically has the potential scaffold between the data poor and data rich (NKC, 2005). Libraries are working for the individuals to help education and social improvement. They are the

accomplices in financial and social headway, self-improvement, deep rooted education and proficiency advancement.

### **Public Library**

Public Library is characterized as a library which is available to the public and by and large financed from public source and might be worked by government worker (Anil Kumar Dhiman and Yasoda Rani, 2011). Public library, as its name proposes, it is for the individuals, by the individuals and of the individuals. It exists from development of humankind and go about as the significant overseer of human culture, learning and social traditions (Kaliya Perumal and Bahskarn, 2010).

UNESCO characterize public library as the nearby portal to information which gives an essential condition to deep rooted learning, autonomous basic leadership in social advancement and social gathering.

The UNESCO proclamation likewise express that it ought to be an organization built up under the unmistakable order of law kept up completely from public store, offering all its administration free of expense and open for nothing and equivalent use by all individuals from the network independent of their age, sex, religion, language and basic degree of education. The starting point of the public library administration vests in classical times with the principal recording of the human idea in the idea of a framework or a foundation which could protect thought for some time later which bit by bit came to be alluded by the term library. As far back as the basic elements of all libraries continued as before accumulation, protection and dispersal of information (UNESCO declaration, 2005).

Public library is a welfare focus which gives valuable services to the network by encouraging education, advancing society, giving extension to sound entertainment and spreads data to all segment of the general public. (Laila T Abraham, 2010). Public libraries are the network education focus with customary style in a more extensive canvas, it gives socio-culture amusement and dispersing data to all area of the general public which regularly give network data using Information Communication Technology (ICT). Public library gives important data sources and administration which can bolster financial and social improvement. It has a critical job in supporting educational foundation in our general public.

### **Economic development**

Public library brings to the table materials and services to the individuals to comprehend social wonder and in this way live effective public activity keeping away from social shades of malice. It gives chances to the individuals to comprehend social

indecencies and strategies to control them. (Kaliya Perumal and Baskaran, 2010).

### **Women Empowerment**

The Routledge International Encyclopedia of Women, characterize Empowerment is a procedure that targets making the condition for the self-assurance of a specific people or gathering. It is summoned to connote the potential for changes and has been effectively as a way to activate individuals to activity. Women Empowerment incorporates Women attention to their privileges, self-assurance, to have an authority over their lives both at home and exterior and their capacity to acquire a change the general public. Strengthening has numerous components which relies on and identify with every others in monetary, social, political and individual. (Mariam Sohail, 2014).
