Abstract – Human values are the virtue that guide to every one individual to lead good personal, social and public life. These values are considered as the guide lines to lead suitable good life. In ancient society human values takes place in higher priority and individual inculcate in their day hesitation values come in to existence in every one's life.

Now in modern era these values become weaker because of less followers. In changing society youths are given less importance to follow the values in their life they think modern independent values are most important in the place of old human values. Honesty, Respect, Empathy, Listening, Appreciation, Affection, Openers, Love towards all human being are good values which are followed by everyone in our society.

-----X-----

OBJECTS:

- To know the practice of values among students
- To Evaluate the level of practices.
- To understand the effect of human values among students

RESEARCH METHODOLOGY:

To obtain information needed to fulfill objectives of the research study 100 questionnaire was drafted questionnaire was circulated among students randomly chosen in different colleges of Chikodi taluka The collected information analyzed by simple percentage method.

FINDING OF THE STUDY:

- Sympathy towards age old parents: In present study 62% percent of the students opine that they have morality like sympathy towards their age old parents. They try to provide cell emotion support to them. Remaining 30percent feel sympathy only sometimes and 8 percent told they do not have any sympathy towards their parents.
- Honesty: 90 percent of the respondents told that they have value like honesty in their daily life. Remaining 10 percent of the

respondents told that they do not have any belief in honesty in this changing society.

3. Openers: Modern science and technology influence on young generation. They do not want to spend time with family members. 73 percent of the respondents having values like openers only sometimes. 22 percent of the respondents do not want to share their feelings with family members. Only 5 percent agreed they have value like openers with all family members in all situations.

4. Patience: The collected information shows that 62 percent of the students told that they have moral value like patience in sometimes for some instance, 28 percent told that they have value of patience in their life. They obey all rules and regulation with patience. Remaining 10 percent do not have, They are not ready to listen any good values and advices of elder members in their life.

5. Personal Responsibility: To taking responsibility is one of the important moral human values in our society. In present changing society majority of young people do not have strength to take their own responsibility 72 percent of the respondents do not want to take their own responsibility. They are depended on their

parents. 12 percent of the respondents take the responsibility only some times. Remaining 16 percent of the respondents ready to take their own responsibility without any one's help.

6. Self-discipline and Adjustment: To accommodate themselves is the one important human values in our society. To accommodate other and adjust them is also good value. 52 percent of the respondents having moral value of self discipline and adjustment. 18 percent told that they have accommodate and adjustment nature only sometimes. Remaining 30 percent do not follow this value they want to lead independent life without any barriers.

CONCLUSION

Values are important because they help to grow and develop. They help us to create the future. Human values refers to society's sense of the right way of living our daily lives. The modern attitude of young generation decrease the value of human values modern science and technology and modern way of living also influenced on college students They do not want to lead controlled life and traditional life.

To bring changes in society to need the practices of good values. It depend on educational system. Family members and education system tries to build good moral and human values among college students. The efforts made in this paper to how college students read and how much they adopt human values in changing scenario.
