Abstract – Gem therapy is old. It is referenced in Unani framework and point by point information and most extreme practice is required. The gem therapy takes a shot at the idea of hues vitality can be called as shading therapy. The cutting edge science has watched the huge impact of hues on the human body. This therapy is innocuous with no reaction, and may resolve numerous prospective issues for the control of issues excited. The center quality of Gemstones lies in the hues they transmit. Sun beams going through a gemstone cause it to emanate a vast shading that is consumed by the body chakras. They are broadly used to recuperate physical and enthusiastic sufferings. What makes a gemstone particular, entrancing, and extraordinary are its shading, cut, straightforwardness and energy. This survey incorporates all subtleties of recuperating forces of Gem therapy. In short we can portray Psycho-neurobics as-'Technique of taking galactic essentialness present known to mankind by the force of cerebrum (the source is GOD) and after that trading it to mind and neurosystem' We can retouch any kind of disease by psycho-neurobics and activate our seven imperativeness centers present in the body. The word psycho stays for 'mind' as we take the huge imperativeness through the force of cerebrum. There are three sorts of neurobics Light neurobics, sound neurobics and easy neurobics in Psycho-neurobics we fuse all the three neurobics.

Keywords- Gem Stones Energy, Psycho Neurobics Energy Influence, Water

-----X-----

INTRODUCTION

In this mechanical world, the life is loaded with pressure and stressed and these frequently bother us. While everyone wants harmony and success throughout everyday life. There are different choices, for example, allopathic medication, homeopathic prescription, Ayurveda, holisticpathy, yoga, naturopathy and so on to support us. The gemstone therapy is one of the antiquated and regular science followed in India million years back however lost experiencing significant change, improves understanding. The vanishing of this science over the most recent couple of hundreds of years gives off an impression of being related with two reasons: - the pioneers in every general public realized the ideas however did not pass on to others for one motivation to other; - the expense of gems and their uncommon accessibility. Anyway this science stayed in the hands of constrained individuals.

Geography and mineralogy are simply the names of the sciences that worry about minerals - among them gems-in the unpleasant; metallurgy is the name of the science that has to do with metals; "gemology" is a word in some cases used to portray the part of craftsmanship or of the specialties that manages gems which have gone through the hands of the precious stone shaper or the lapidary. In Gem

therapy the shading starts in a gem and every gem when seen through a crystal has its possess specific shading and by drinking the impregnated fluid the patient is relieved. The Earth's outside is a strong layer on a sea of liquid magma and most of gems have accelerated out of this primordial pool of minerals. Indeed, even the Pearl normally originates from the sea profundity Nearly 2000 years prior, shading lobbies were made in numerous nations where patients used to clean up for fix of their sicknesses. It has presumably that the hues demonstrate an extraordinary effect on the arrangement of human body. How they work it isn't obviously comprehended Concealing is a kind of vibrational essentialness that has expected a basic employment in prosperity and repairing for an enormous number of years. the old Egyptians created hallways of concealing in their fantastic havens at hebes and various spots, where they looked into the effects of light and concealing. each shade of the range is connected with an extent of wavelengths, which suggests that there are a few unassuming nuances of concealing. not these are recognizable to the human eye, since tints vibrating at comparative rates look especially undefined. violet wavelengths are the most limited, reaching out from around 380 to 450 nanometres (nm.). red wavelengths are the longest, crossing 630 to 760 nm. Different shades impact the mind, body and

soul in different ways and most social orders associate tints with explicit attributes, slants, and whatnot. concealing is one of the nine major 'fixes' associated in Feng shui, the Chinese claim to fame of divination and planning imperativeness (qi) to make conditions that are useful for prosperity, fulfillment and great karma. Some essential thoughts regarding different tints are:

White: - white is truly not a hiding, as it is the inevitable result of the amazing number of shades blending in equivalent degrees. in the west, it is associated with uprightness, guiltlessness and tidiness.

Violet and indigo: - these shades are connected with supernatural quality, dedication, heavenly and love. Leonardo da Vinci affirmed that the force of reflection could be improved multiple times influenced by violet shafts experiencing the recoloured glass windows of a serene church. in Calmed tones, this concealing can be valuable for treating headaches, mental issues, and particular sorts of schizophrenia and dementia.

Blue: - blue is connected with certainty, careful, congruity and steadiness. cornflower and lavender blue explicitly speak to mystery, astuteness, consistent quality and generosity.

Green: - green is all around seen as the shade of development, repairing, kind-hearted love and quietness. The green shade of plants raises love and congeniality to straightforwardness-harried characters. Green is connected with the heart and when we think green, it attracts whatever we need to feel continued and calm. An abundance of green can make a static condition since it facilitates a wide scope of weight.

Yellow: - yellow represents persistence, resistance, satisfaction, joy, knowledge and mental vitality. It grows skylines and brings satisfaction. in china , charms against fiendishness spirits are written on yellow paper.

Orange: - orange represents immaculateness, fellowship and well-mannered erotic nature.

Pink: - pink is a warming, calming, consoling shading that represents love and sentiment. When you feel furious, figure pink and the outrage will vanish.

Red: - red is an energetic and blending shading, which identifies with self-discipline, life and strength. it is an exceptionally enthusiastic and stimulating shading. in the event that you are over passionate or hyperactive, it is best not to encircle yourself with this shading. in china , red is the image of ethicalness.

LITERATURE REVIEW

F. J. Heide (2012) Science proposes that there is a reason for these affiliations. Studies have demonstrated that shading can impact disposition, impression of temperature and time, and even the capacity to focus.

E. McSherry (2014). it is being utilized progressively in doctor's facilities, workplaces, mental wellbeing centres and detainment facilities to make a positive domain.

D. Shapiro and H. Deane (2015). Red light has been found to accelerate the dissemination and raise circulatory strain, while blue has a quieting impact on these procedures. The impact is the equivalent regardless of whether the patient is blindfolded, which suggests that shading does not need to be believed to apply its belongings.

M. A. Persinger (2015). Daze individuals can see diverse hues through their third eye, so it appears to be almost certain that we react to various shading vibrations by means of the unpretentious life structures, the unobtrusive bodies, atmosphere and chakras.

OBJECTIVES OF THE STUDY:

1. To measure the frequency and vibration imprints emitted by each chakra Gemstone when immersed in glass of water.
2. To measure the frequency and vibration imprints of 7 chakra colour intentions induced mentally using Psycho Neurobics technique by touch to glass of water.
3. To determine the effectiveness of psychoneurotic on the level of stress

FIG 1- SYSTEM SETUP (LEFT TO RIGHT) WATER SENSOR, BIO-WELL CAMERA AND WINDOWS COMPUTER LOADED WITH BIO-WELL SOFTWARE

FIG 2 – 7 CHAKRA GEM STONES USED IN THIS EXPERIMENT

FIG 3 – ROOT CHAKRA GEM STONE IMMERSED IN WATER (IN PROCESS)

FIG 4 – SUBJECT TRANSMITTING INTENTIONS

METHODS:

1. **Charging the water with vibrational energy**
 - a. Normal water in glass was used to energise.
 - b. 7 chakra stones (Fig 2) were part of the experiment setup (Fig 1).
 - c. Water sensor connected to bio-well device was inserted in glass with conductive water.

- d. Each of the 7nos chakra Gem stones were immersed in glass of water at 5 minutes interval (Fig 3) and the total scan of experiment was run for 38 minutes (35+3) where 3 minutes was initial warm time of the device.
 - e. A total of 7 readings were done and all the readings were captured in real time dynamic mode.
 - f. After the scan was completed the results were downloaded for editing the labels and statistical analysis.
2. **Charging the water with Psycho Neurobics meditation**
 - a. Normal water was used to energise
 - b. Mental energy intentions of seven colours (VIBGYOR) using Psycho Neurobics technique was used.
 - c. Water sensor connected to bio-well device was inserted in glass with conductive water
 - d. Each of the 7nos colour intentions were transmitted to water at 5 minutes interval and the total scan of experiment was run for 38 minutes (35+3) where 3 minutes was initial warm time of the device. (Fig 4)
 - e. A total of 7 readings were done and all the readings were captured in real time dynamic mode.
 - f. After the scan was completed the results were downloaded for editing the labels and statistical analysis.

INTERPRETATION OF RESULTS:

Terms used:

Area – Bio-Well Software parameter calculated as number of pixels on the GI (glow image) related to the object being analysed.

Energy – Bio-Well Software parameter derived as numeric evaluation of the energy of the Glow captured by the Bio-Well device and calculated by multiplication of Area on Average Intensity on correction coefficient.

Intensity - Bio-Well Software parameter calculated as average value of intensity (brightness from 0 (black) till 255 (white)) of pixels on the GI related to the object being analyzed.

Entropy - is the amount of disorder in a system is a measure of disorder or randomness of a system.

So if entropy is the amount of disorder, negative entropy means something has less disorder or more order.

Deviation S – Bio-Well software parameter calculated as standard deviation of the Area parameter of the last 20 captured GI.

RESULTS OF CHARGING THE WATER WITH GEM STONES ENERGY ANALYSIS FOR AREA, INTENSITY, ENERGY, DEVIATION-S AND ENTROPHY USING BIO-WELL WATER SENSOR:

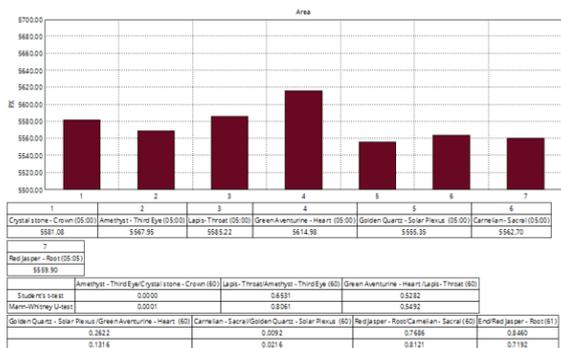

CHART-1 – AREA OF EACH GEM STONE CHAKRA

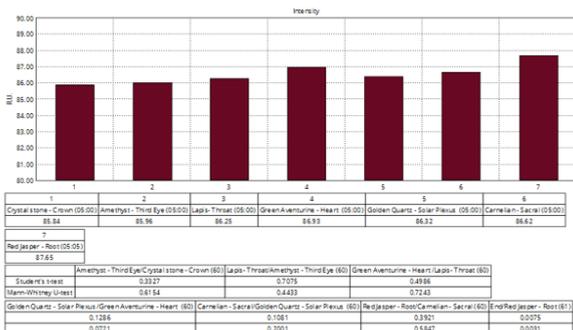

CHART-2 – INTENSITY OF EACH GEM STONE CHAKRA

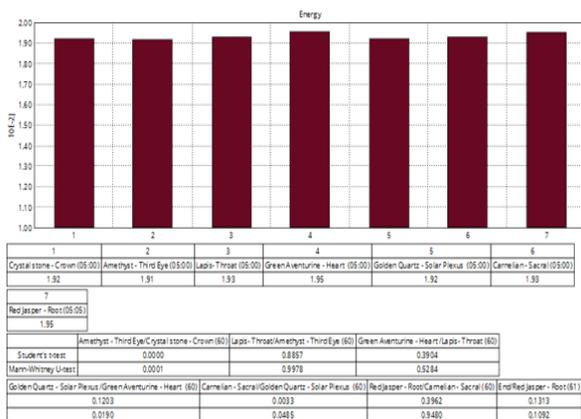

CHART-3 – ENERGY OF EACH GEM STONE CHAKRA

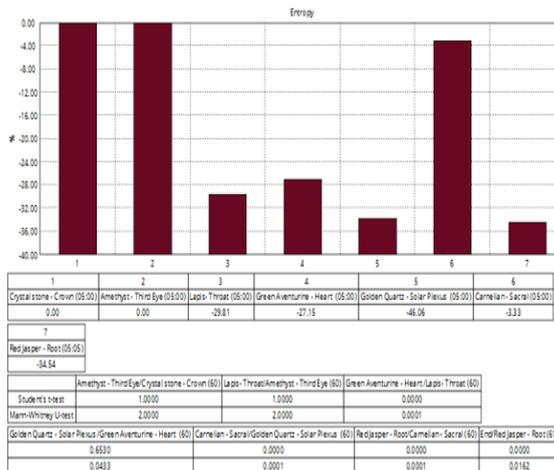

CHART-4 – ENTROPY OF EACH GEM STONE CHAKRA

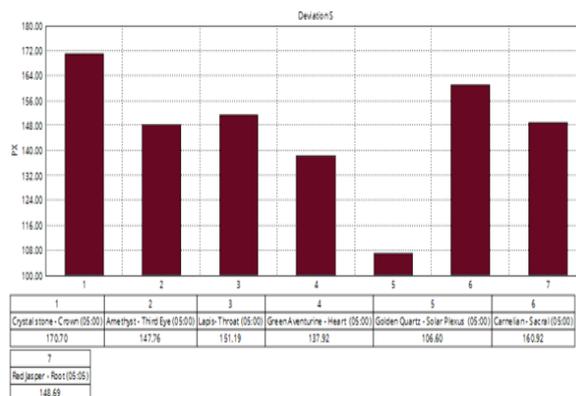

CHART-5 – DEVIATION-S OF EACH GEM STONE CHAKRA

RESULTS OF CHARGING WATER WITH PSYCHO NEUROBICS MEDIATION ANALYSIS FOR AREA, INTENSITY, ENERGY, DEVIATION-S AND ENTROPHY USING BIO-WELL WATER SENSOR:

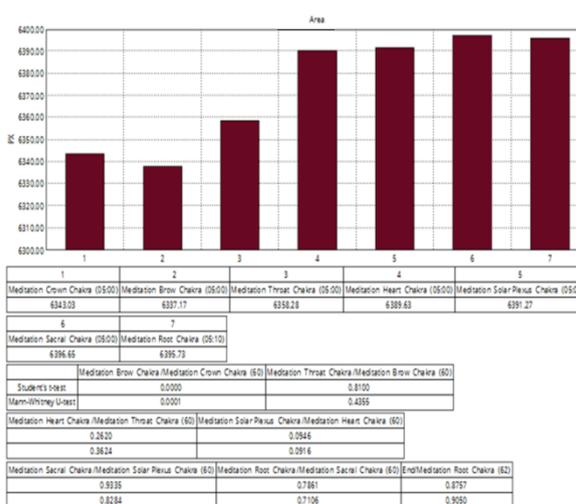

CHART-6 – AREA OF EACH MEDITATIONAL CHAKRA

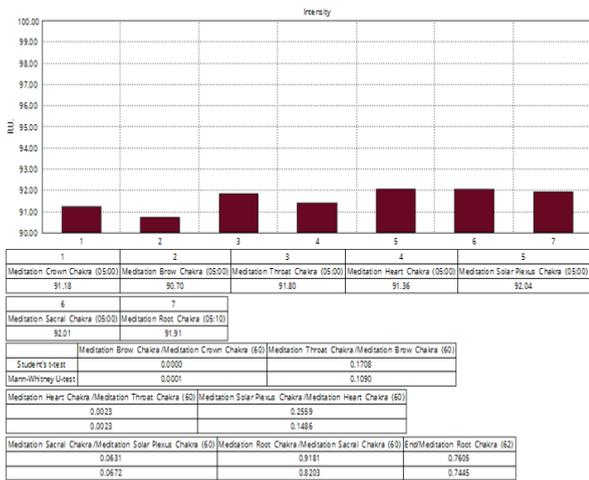

CHART-7 – INTENSITY OF EACH MEDITATIONAL CHAKRA

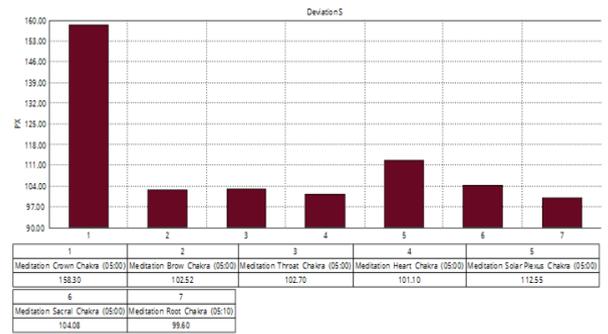

CHART-10 – DEVIATION-S AREA OF EACH MEDITATIONAL CHAKRA

COMPARATIVE ANALYSIS GEMS ONE ENERGY VS PSYCHO NEUROBICS MEDITATION ENERGY FOR AREA, INTENSITY, ENERGY, DEVIATION-S AND ENTROPHY

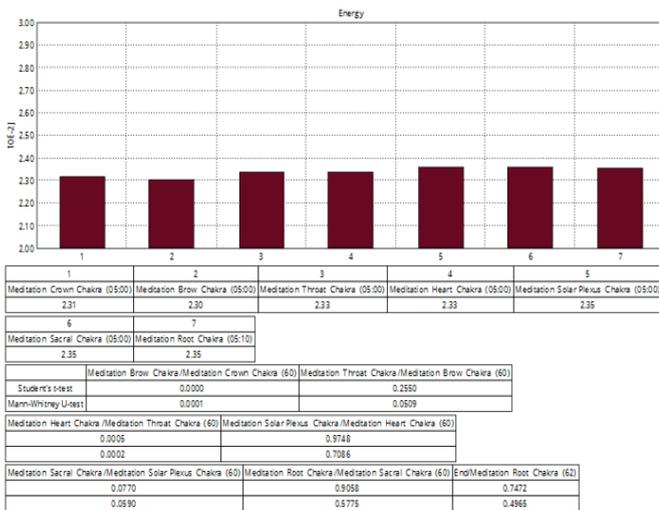

CHART-8 – ENERGY OF EACH MEDITATIONAL CHAKRA

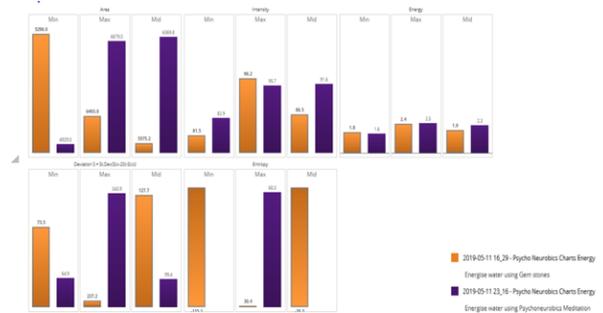

CHART-11 – COMPARATIVE BAR CHART INFLUENCE OF GEM STONE ENERGY VS MEDITATIONAL ENERGY FOR EACH 7 CHAKRAS ON WATER

Water sensor is most useful for relative comparison of liquids with the same chemical composition absolute values of the GI will have no sense at all, only the deviation of signal in time will have some meaning (Deviation S).

Max Deviation - S with Psycho Neurobics Meditation = 343.9

Max Deviation - S with Gem stone Energy = 227.2

The influence on SELF meditation on water was 1.51 times more POWERFUL when compared to Gem stones energy.

CONCLUSION:

The highest influence of energy on water was observed from the colour intentions showered by connecting to the Supreme during Psycho Neurobics meditation. In the future researcher suggest increasing the sample size in order to magnify the effects of psychoneurobics and to prove psychoneurobic practice enhances the quality of life. Ultimately Research is needed to prove psychoneurobics is the way of life. So once we connect to our inner Supreme energy, the ocean of powerful and positive healing emotions

we can maintain positive energy and wellness of human beings.

The positive changes in the **both** the therapies indicate that they are useful to the subject for enhancing health or healing. Nonetheless, these data demonstrate some of the promising features of this new method of scientific analysis using digital GI. It appears to be a stable method of ascertaining various features about the energy, both qualitatively and quantitatively and promises to be one useful method of investigating the energy.
